

Mitigate your risk of fraud and
streamline your customer experiences

Real-time Identity Verification

- ✓ Support KYC compliance
- ✓ Reduce operational expenses

- ✓ Mitigate enrollment fraud
- ✓ Improve customer experience

Why use Oliu

Layered Verification

Oliu orchestrates layered identity verification across multiple trusted and independent data sources, including provincial credentials like an Alberta.ca Account, financial institution credentials, and document ID like a passport or a driver's license.

Customer Centric

Oliu enables custom experiences to embed into your existing workflows. You'll reduce onboarding time, eliminate friction, minimize human errors, and optimize operational expenses, all while building customer trust.

DIACC PCTF Certified

Oliu's certification is a public assurance that our service is consistent, standardized, accessible, inclusive, interoperable, and meets international privacy and security standards and regulations.

How it works

- 1 Customer selects their ID verification method.
- 2 Oliu verifies their chosen form of ID.
- 3 Oliu extracts and auto-populates personal information.
